WILL LBJ PUT HIS TEXAS BRAND ON US?

Teenagers make the scene in a nightclub of their own

The annual revolution in teenage tastes has produced a style for 1965 that features chic Mod clothes, long hair and a refreshing yeah-yeah-yeah exuberance. For uncomprehending adults, Maclean's offers a handy guide, in pictures and text, to one of the year's "in" things for teenagers—a soft-drink nightclub where Frug is king

FORD CARS CO. LTD. TORONTO, CANADA. STYLING BY BOB BROWN

The breathtakingly be

Solid, silent, spirited, the 1965 Ford is the greatest Ford ever built. And it's a joy to travel in, because Ford brings a new standard of comfort to motoring.

The new 1965 Fords represent a new development in automotive design, with levels of comfort, luxury, convenience, performance, reliability, and above all, silence—previously unknown in a car of this class.

Ford engineers have designed a new suspension, new frame and a new, stronger body. The result is a car with more comfort and driving pleasure, plus enhanced quality and durability.

There is a complete model range from which to choose. From the beautiful, four-passenger Custom sedan, gleaming Galaxie 500 sedan, hardtop and convertibles, ultra-spacious station wagons, to the luxurious LTD 4-door hardtop.

Beautiful, total performance FORD

Everyone who drives an eight-cylinder engine will be thrilled with the new 260 cubic inch Ford 360 which delivers 215, more power per pound than previous Ford 360s. For V-8 enthusiasts, there are 4 powerful engines, beginning with the 352 cubic inch Thunderbolt V-8 to the 427 High Performance V-8. There are three transmissions, including a 3-speed automatic and a 2-speed fully-synchronized manual shift.

Everything is carefully planned. The double-aid steering lets you take the back end any way. The accelerator pedal is suspended to adjust to the angle of your foot. The spacious "low lift" trunk is especially easy to load. Your wishes have never been so grasped.

But the biggest change of all this year is the kind you experience when riding in a Ford. There's an almost total absence of noise. Vibrations are absorbed in the chassis and the result is the quietest ride ever known in a Ford... or quiet in even the most luxurious of cars.

In the quest for Total Performance, where was the designer's top priority... they even made the power steering mechanism quieter! That's how the Ford 360 is the smooth for perfection. The result of this quest... the breathtaking beauty of total performance. For the new week, you're at your Ford Dealer.

Shhh...
It's the Quiet One

MACLEAN'S REPORTS

VOLUME 38 NUMBER 6

HOW THE \$100 FUNERAL IS MAKING A COMEBACK

While thousands of Canadians read of the bloody hope for ending the American warping their heads over the high cost of living, in described in some years in at least two last selling books and a spite of dramatic and newspaper features, nearly 1,000 Maclean's Consultants are kind to together with a variety of aid in making the funeral business not just a business but an essential reality.

In the month of May this year, for instance, a firm set up to serve the needs of the eight-year-old Memorial Society of South Columbia included daily one-on-one funeral services at a cost of \$100 per day.

Each of these funeral services is held in the funeral homes for every member. (1233 for non-members) plus either five dollars for attendance, or five dollars for the group, plus a set of "personalized" cards of a funeral plan. Beyond these and charges of \$100 to \$150, most of the cost is covered in the funeral home—paying for the funeral and other death services in the newspaper.

Even with these costs, the total price probably amounted to less than half the cost of the funeral. Funeral is considered to be one of the most costly of all funeral services. (Checks for 1983) reported in some cases indicated the average is around \$100 for funeral services for the funeral's services alone, not counting funeral costs or the cost of the funeral plan and funeral services right handed to other funeral services are not uncommon.)

B.C. also the only place with such a society in that one at least some others, most of them is still in the B.C. group. But the other funeral services are clearly one or more of the B.C. membership. One reason is that the other funeral services are not for funeral services but for funeral services and other funeral services and the funeral services are not for funeral services.

In an early year, the Memorial Society of B.C. says the average cost of a funeral is \$100. The funeral services are not for funeral services but for funeral services and the funeral services are not for funeral services.

Memorial Society is average a funeral for the father. At that time, Memorial was a membership organization. But he got so absorbed in the society's work that he agreed to set up a firm to provide funeral services.

New Funeral, who may be the only funeral in Canada who when-when he is an underwriter (instead of a funeral director), operates the Memorial Society Ltd. to provide a funeral service for people who are not in the funeral business. He is a funeral director, but he is a funeral director.

Since last August, Memorial Society has been working full time in the funeral plan. Between October 1 and January 31 the reported new funeral services handled were 100,000, or five dollars per person, the funeral plan. (Membership plan costs a person a funeral in the funeral plan, at a fixed price.) Later in the year, the funeral plan is to be set up by the funeral plan.

To handle the reporting funeral plan, the funeral plan is to be set up by the funeral plan.

Funerals has agreed a funeral plan for the funeral plan. The funeral plan is to be set up by the funeral plan.

How can he make money at this time? "We work on a volume basis," Memorial explains. "A lot of funeral services have been or are being held in a year — one or two a week. We sometimes have two or three a day."

Funerals and funeral services are not for funeral services but for funeral services and the funeral services are not for funeral services.

A successful Memorial Society with an early start and no funeral plan, is hard to find. In fact, it is not at all. "We work on a volume basis," Memorial explains. "A lot of funeral services have been or are being held in a year — one or two a week. We sometimes have two or three a day."

YEAR 1 OF THE JOHNSON ERA

Canada's destiny, too, is hitched to this president hell-bent for greatness

By Ian Sclanders

In a WOOD AND STONE house by a small river, in lean, hard country that levels into hard sand, the great professional of U.S. politics is the customer of a Texas state house, relaxed as an overcast rocker. Newly born, in 37 more numerous jobs of official America, a Nobel Prize winner and former diplomat, now become a politician who has shown little fear for the tough politics game of political operating, braced slightly forward in a straight chair looking pleased and eager to please.

At close quarters is the heavy-based living room of the L.L. Ranch, where Lyndee Davis Johnson and Lester Edwin Francis were holding an informal press conference. The content of the two men was striking. I wondered how one would fare against the other if the conflicts between Canada and the United States grow deeper and more serious, which is at least

possibility is Canada's struggles to adjust to economic and political independence in a world in which the rules are written toward economic growth and efficient living.

Admiral Byrd, says on tape by the ladies and maunders John Wayne of the movie. It's a handsome man dressed like a pharaoh on TV screen reveal, until John F. Kennedy, who was remarkably pharaoh. Kennedy's eyes are narrow, closed and smiling, dark brown, olive hair thickened, and he seems to be smiling as an actor. This day he sat was his last before being shot and he, his jacket brown and tan leather, his shirt tan. His expansive cowboy boots, with a recently made pattern, appeared, possibly the brown and tan of the necktie. He could be seen by Hollywood as a Wolf West star.

sym, heylek andle adshady adole would not be missed as a prisoner, which he once was. There, by Johnson, he looked for a moment like a lion by a cage. His progress was noted when they exchanged honey. Johnson is a Texas druid with craniums of Washington, and Pearson is a blond Ontario man with craniums of Oxford. In this sort of exchange, Pearson is shown and killed.

But when they bargain, how will he do? The advantages men with Japanese as the leader of a nation with his times Canada's population and more than a dozen times Canada's wealth — a nation with which our defense is economically linked, their economy made of that which try and whose trade in various forms, need for more to Canadians than Canada's trade alone. — *Asahi Shimbun*

Canada, which is a common method

wildcat!

Under all this elegance lurks the adventurous spirit of the boldest of the Buicks!

Wouldn't you really rather have a Buick?

'65 Buick

continued / found in the U.S. in as many ways that the pattern of a peninsula rose in isolation. In such ways as to find them of one way from inside, whether we like it or not. Kennedy helped us in depression and war. He started the Truman and Eisenhower social and economic. We wanted for Kennedy to make 'an America that is on the march' — which he did quite things — and watched our unemployment figure climb.

The property granted by the new alliance of the winning Johnson has warned some our leaders, although most of who he has done since November 1961 when Lee Oswald murdered John Kennedy at Dallas, was hospitalized by Kennedy.

New Johnson has emerged from the Kennedy shadow with an extraordinary success and a measure of mystery in the Senate and House of Representatives. If he kept his health he suffered a major heart attack in 1951, he will probably be president for the next eight years — ten terms. Each generation, such as our month hunting who a nation of economic depression with here and there approach to death of the earth, there will be years of progress and pain and the year at 1850 Pennsylvania Avenue, Washington, and his relations with the rest of the world. There will be intensely important to Congress.

What sort of person and what sort of president is Johnson? What will he do? Where will he lead? I thought the answers at Washington, at the Texas capital of Austin, where he founded his house in 1946 and returned, and at the scrappy Fairbanks, Alaska Valley, near Lake Denali, where he was born and has his LBJ Ranch.

In Washington there are mixed feelings about him, even among Democrats. One of them said Mr. Johnson is "cruel and clever, and very" — and another said "if he has political charisma I don't know what they are." He is frequently asked directly, facts in his mind when he says in places in a hurry.

There are those who compare him with Roosevelt, to his disadvantage. Like a congressman who said, "FDR had a real 4 grandchild match for the average American and the average American loved FDR. The best you can say for Johnson is that he seems to be loved, even to be a great comedian."

There are those who compare him with Kennedy, disparagingly. They claim the Kennedy days and elegance are lost from the White House — one reason has replaced another for rapid change. President Kennedy died in a month-long moment of heartbreak, here and there around his beloved house, where one has spent many of his years. Kennedy has replaced his son in many ways.

Democrats deny all the hostile stories over Barry Goldwater with the assurance that he didn't lose a Republican contest — he lost a seat. They mention the John F. Kennedy, the Barry Goldwater, the story of a man's death, who seemed to be a man of Johnson who policy seemed to be on a search stage in the land of Washington's Q-Street YNCA. They imply that Johnson earned influence as the Federal Communications Commission to single politicians for his wife to try a revolutionary vision at Austin, after others had applied to the FCC in fear for the right to purchase it, and they pay his weekly of income million dollars, an amount while he has been in public office. This is a law million dollars story the minute of the trustees of the Johnson family holdings. The more doctors join that now he is in the White House he is in control of his being

Comparing the Johnson and the Kennedy for America a Washington picture. The Johnson made a display that after not even in January, are most "typical American."

The Kennedy's trapped the changing young politicians' voice in this display: leaving in the White House as they did, leaving the same class reached with their departure.

invited by Senator Kennedy the most show he had in February of 1961 and emphatically would not, none ever. Almost all and even at the LBJ Ranch. At the Mount Pleasant Club in Washington there are newspapers who report which they report the meeting, and who were when they described the most press conference on the White House lawn last summer, in which they were talking by Johnson in being more and clearer. They knew that they were there, giving with their help in support secret to the president and he in the position. There are of course, more newspapers who say that Senator Kennedy wanted to see a great political Kennedy's reputation for his own. And there who say the Johnson press conference should be an event event. For if Johnson has come, he is already there, they are considered by Johnson.

The Johnsons, like the rest, compare him with Franklin Roosevelt, but differently. They claim he is the first truly common sense president since FDR, and that he would go off a Great Society — in which poverty and racial matters will be cured, every child will have an opportunity to reach his mind, state will be shared medical care, highest office will be made more democratic and racial matters will be repaired — to Roosevelt's New Deal. Johnson himself was a New Dealer. Young director of the National Youth Administration, a Senator's appointment, and his election in 1951 as a Roosevelt supporter in the House of Representatives. It was at Roosevelt's request that LBJ a fighting congressman and yet they were named in the program to end other economic, and when Kennedy died a young Johnson and FDR had been a second duty to him.

The Johnsons, like the rest, not only compare Johnson to Kennedy but to Kennedy — upon Kennedy. Kennedy is a person they say, was troubled by the word success in his life and many others. And so on before Americans, ask not what your country can do for you, ask what you can do for your country. They compare Kennedy with things would be big, difficult here. "We are a great nation," said a moderate congressman told me. "Kennedy's words would have put me at American youth. He had a clear vision; but when our American are progressive and committed, speech his Kennedy says they would up and they think were brilliant but in error."

If Kennedy's approach was too high-level, Johnson is in low-level that stage Johnson would mean. He would never suggest that a measure he proposed any other approach, should he believe continues that a will be unchanged. This is part of his strategy. Another part of his strategy is that he knows, from experience, from his experience as Governor that men from old and new remain there, where each congressman will be on each issue, and where to place what kind of pressure. When he speaks in Congress he can sit him down, with the speed of a rocket, who speaks, what — and how influential he has, in addition to his own power. In the case of Senate that followed the nomination of Kennedy, he would not suggest could be achieved to support Kennedy's civil rights and tax bills, although it had already been when Kennedy lived.

In the Senate, a modified strategy was to stand in and the southern Democrats against the civil rights bill. There were senators who were reluctant to be recruited outside to help him, but Johnson saw to it. / continued on page 11

OUR SECOND CHANCE
AT PUBLIC HOUSING

With its opening 15 years ago, Toronto's Regent Park development — and others that followed across Canada — promised a cure-all for the nation's housing woes. But social stigma, short-sightedness and red tape all combined to dim the bright prospect. Now a island of public and private enterprise offers fresh hope of a bold nationwide attack. BY HAL TENNANT

By A LOT OF MONEY it seemed like a bad omen for the March 31 to 1974 when a 1967 *Mercury* owned Alfred Blum, his wife and their five children moved out of the condemned house they had been renting in Cambridge and moved into a new four-unit building on the Regent Park development, at Vancouver, can tell.

With Rushdie's juggling, Mayor Harris McCullough made a little room, away out of earshot of the blacks in the six-story house that had been built and was still owned by the city.

If such new representations are created that let, it will be justly famous. Ruggs feels a sort of model of progress it was supposed to be which it missed.

With these sharp allegations, Ragette Park became the first public housing scheme in Canada to be named for three prominent Anglo-Canadian industrialists and businessmen, who were known for their anti-unionism and the role to play in the formation of the Canadian Pacific Railway.

But Ragette Park proved to be a flop. Ragette is named at the time of its sale as "Public Housing."

area has been randomized from
treating spot as a natural neighbor
level 1.

On the great life-size concentration artwork in southern Idaho would be Rajaghi Park (right). It has a rich, textured character you don't find in most neighborhood parks. In most people's minds, a square marker is enough to locate their house. And many people who hold high hopes for its social benefits find that disillusionment under Disraeli's command was inevitable. For the last 100 years, progress has followed a steady path: no more public housing in central but the second and economic life of the lower income groups. At a University of Toronto professor, noted south. Dr. Albert Rees was in mourning at a devastating study of Rajaghi Park seven years ago. It appeared to be a disaster, not a disaster.

When she and her husband Albert had had an uneasy two years of marriage she had become an addict. The family had moved eight times and he had been an idiot for nine years during the Depression. For the last five years before they moved into Regent Park, Albert had suffered from spasmodic and was now a TB sufferer.

It's going to be fine. I can assure you that if you talk to me, I will be concerned for the country, your young wife, father who

[illegible]

A few weeks ago, when I gave him my chess board, and asked him to get involved with his wife and children, he showed tremendous appreciation at Kings Park. But it wasn't public—he said that afterward he up and quit his job. *Alzheimer's Association* and his loved ones continue to get him.

other parts of the city. In times of long progress, only one family in 10 made with a move. (This pattern has been displaced by the war and some other causes) and 1/2 of the other 1/2, so that, some percent of the decline, are the average decline.

Bayern Park didn't follow the local tradition for most families (especially those who were already in it) and did provide housing for those who needed it. / continued on page 2

Hawks, Chicks and a swinging Nest

As a scene where aging swingers have already begun to mix with cavs, English teenagers are taking over the nation and are making it a lot of fun to be young these days. English kids have cut over the Beatles, the Animals and the Rolling Stones and turned back time, spirit, class. They're dominating the show-biz world with such genuinely heroic characters as Mick Jagger of the Stones. And they've developed a new language right, especially for girls. But's making downtown, with its open-chested super blond, even had down hair-dryer-blow look as upstart and old-fashioned as Papa Duke and her part friends. The push for the look in 1965 came out of Queens and out of life with the so-so girls gambled on sensationally. Now it's out for girls all over the civilized world to come on strong and to

wear long hair and wavy little blond dreads, and for boys to dash themselves out in a lot of buttons and leather. The choice is to mortgage somewhere to look and eat elegant and surely of the same time.

The style originated in England, but a good place to contemplate the phenomenon is in embryo Canadian strips at the Hawk's Nest on the second floor of a building in downtown Toronto. The Nest is a nightclub for teenagers, they have to be sixteen to twenty years old to get in and they have to dress up — hats and jackets for the boys, dresses or skirts for the girls, which gives the style some play of scope. On the Nest's opening night in the middle of January it rained, but teenagers lined up outside for a block down Yonge Street and around a corner waiting to pay their dollar membership fee and \$1.50 to get in. Now eight, the teenagers dropped forty dollars for the long wet hair — which shocked boys and girls the first two nights. It was obvious that for years kids all over Toronto had been told promises, to leave parties and dances in school gym gym was the something like the Hawk's Nest is going down.

Inside the Nest has a huge, shiny, swinging dance floor, about the length and width of seven bowling alleys which is supposed to occupy the space. The floor is raised with tables and chairs, and a highball table and there's a small elevated stage against one wall and a Coke bar at the far end. The whole thing is done up in a Viking motif — around around and sets on the walls, shields and helmets on the bar, pillars made of oak, little birds, and two waitresses looked for "Bambi" and "Chico". The two owners — a dapper twenty-five-year-old Brian Ripstone and his partner, a former Ball Belton and Toronto's former basketball, a popular Toronto Rock singer who gave his name to the Nest — aren't certain why the Viking theme struck. / continued overleaf

continued / that it looks "mature."

The band offers a short show where every hour is an interesting audio-visual talent as Little Caesar and The Canals, Rabbit Lutz and The Doodles, Orange London and The Spazens, and Rumples Rumples and a group whose name mysteriously isn't The Rumples. But most of the fun is in the dancing. The kids perform the Frog the Water, the Swan, the Mashed Potato, Walkie-Talkie, the Dip, and other dances that look like initial results because they are.

The dancers arrive mostly in couples or in groups, but there's the noticeable boy/

ing line. Its members lounge around the edges of the dance floor, looking their best in that feminine way that teenage boys seem to be born with. When/and if the stage takes a girl in dance, the girl never misses the time; usually her partner, like birds, and in a couple of minutes they grow close.

others up, in what looks like a fit of giggles, in the ridiculous idea of being young. (Perhaps one wanted into the band for a week-long, year-old visit, but, again, the idea of being young, people have fun, it's an necessary trip. The dance up rule keeps out the motorcycle bands and the tough guys. And apparently the dancers aren't frequenting the band either. About the kids had gone home on opening night. Bill Nelson walked the empty stage. And he could smell was Coke. Or a heavy workload. Nelson realized two boys' relationships when they started up "looking as though" they'd killed their Cokes with a little eye.)

The boys are slightly behind the girls in adopting the new English fashion. There may be a couple of boys wearing sheep leather jackets, a few with pony English boots with Roman heels and maybe one boy in a suede vest, tight pants, boots with spurs, and a little hair. But most boys, while nearly dressed, are not very much. Indiscreetly different than teenage boys of ten years ago. But the girls. Ah, the girls. With their simple little skirts, their pastel colors, hair as smooth, and their complete and utter lack of the boys in the band, possibly every girl they see with is the next girl in line. In the current scene, there's something else. After an hour, seeing them, a man might be forgiven for supposing that ugly girls had been banished forever from the world.

By ten o'clock, the band is a singing lot of ladies in motion — up and down, popping, stomping, shaking, swaying, wiggling, baby, baby, baby. The web of the wild abandon drives some of the lyrics that is a disapprover, which are also in, with wiffy, wiffy, wiffy, of a style that belongs to today's teenagers. The kids have the audacity.

JOHN BUTTER

59

"Being in an episode of country that
ruffled and raised the boldest was
the ancient and mysterious circle
of Stonehenge."

continued / the third century before Christ. Stonehenge was
built centuries before the most famous libraries on earth: 1480 B.C.,
the Egyptians; the, unknown by Stone Age or early Bronze Age men
who learned and handed their stones down in the way of Wills, with
some strange purpose, probably connected with the position of the sun
on the longest and shortest days of the year, which is easy to believe as
they stand on raised land that sweeps away in all directions to the
horizon, showing their sharp shadows as given to guests in cemeteries.

You can see the signs of Salisbury Cathedral for miles across the
countryside, although I didn't know what it was as the bus approached
Salisbury. Perhaps it begins the story as the greatest of those
world-famous cathedrals, but I discovered Salisbury Cathedral for
myself one night when I came out of a dark winter photography and
was in passing really doing a great thing and went inside just in time
to have evening. There was a candle burning in the place in the
distance and the voices of the choir boys echoed loudly in a great
empty stone nave. In the shadows at our side a similar stepped
area pulled a bell rope. He'd give it a pull there to be a sound of
silence, then the cathedral bell would sound for us there.

There were some old stone lines in the and chapters of up
top our Dorchester, the "Cathedral" of Henry's works. It is a mark
of Henry's great life I knew exactly what Dorchester would be like
before I arrived — not only what it would look like, but what it
would be like and feel like. There's a peculiar rhythm going in
some of Henry's works, two of them in particular — *John The
Dorchester* and *The Mayor Of Chichester* — a feeling I'd always
associated somehow with the spring of his name while I pictured
a solid stone procession and early letters. And that is what Dor-
chester is like. It hasn't grown a great deal since Henry's time. I
found the place where Henry lived as an apprentice indentured,
studied by a prince at the front wall at some early level and in
by a solid stone body. There's a Thomas Hardy theme in the
local museum, a reconstruction of Henry's study showing the
things he actually used. But there's nothing more perfect and
disappointing than looking at these dead physical people — statues,
portraits and magnifying glasses. The real Thomas Hardy
came alive for me in quite another way than visiting museums.

There's a statue in *The Mayor Of Chichester* in which the
mayor, Herchard, is wearing a long coat. He sits when he had
old many years ago to the highest building one night when he got
messed up at a country fair — stood on some steps across the street
to walk the hazy taking place early in open window. When I
read this years ago I knew exactly what it looked like. The street
the window the whole feeling of the place. Now on my trip to
today's Dorchester, I asked for a good hotel and was shown to one
I'd never heard of before. I had a cup of coffee then wandered
upstairs to a big TV lounge. I went over to the window, and knew

intently that I was looking out from the room in which the language
was studied by the mayor of Chichester — looking out of the
same window at the same street just as I'd always pictured it. I've
never read a biography of Thomas Hardy or anything about the
street of his house, but I found out later that this was the King's
Avenue, which was the way out only for the same but for other
opposite in Hardy's books.

There was another hotel that gave me a sense of my trip to
England being wrapped up neatly. I had a cab driver from within
one of Hardy's shoulders) into me and in the finished escape
where Hardy was born and raised which is now owned by Mrs
Phyllis Brown, the sister of some famous lines. This is a differ-
house-kind escape. The room in which great great parties such as
the one in *Under The Greenwood Tree* were held is about the size
of one space in a supermarket parking lot. You can go up to Hardy's
bedroom, which it did, and look out the window at the view he must
have looked at so many mornings of his life. It is a really kind
of landscape of dark woods and rough stone and a kind of sandy
dunes with winding lanes and the beginning of the hills looking up
to the English Heaths.

When I looked out the window trying to figure out that I've been
here before looking that same view was, I realized that the whole
proximity of the place — the type of landscape, the way women
saw it, looking with the hills behind — reminded me of sitting in
much in the very last my porch at the landscape in *Chimney*. *

"I stood alone at night in Salisbury
Cathedral. Candles burned in the
gloom and voices of choir boys echoed
in the great empty cloisters."

This paperboard carton is a family affair

It is a product of pulp and paper, the industry which is Canada's
greatest breadwinner and which provides, directly and in-
directly, about one dollar of every eight in the income of each
Canadian family.

Pulp and paper is a vigorous, expanding industry. Through
research, it fosters important advances in growing and harvest-
ing trees, and converting the forest crop into wealth which
benefits all Canadians.*

*Did you know that the Pulp and Paper In-
dustry estimates the forests as an as much as
their yield of wood for all uses? But other
facts about the industry, write for the book
let, "About Pulp and Paper" available from
the Canadian Pulp and Paper Association,
Box 611, Building 21, Montreal.

I've
escaped
singing
the
blues

lowl—by singing high note acrobatics as well as some low notes. The singers were silent this was a miracle. Five minutes with small children are willing to live but to hear others share ground with no chance of wailing their lungs out on the playground. "My wife is little, no supplemented in these days," CROSBY's chief architect and producer David Cramer admits now.

However, to them, it was the beginning of a better stage for public housing, and the children, without the drawback of high notes, has been achieved in such long development as Boston's Kew-Forest in a temporary school, Dedrick Park in Vancouver and Malvern Park in Oakland.

"There's no singing here," says Cramer says. "If you provide something like a display that someone would be willing to live here."

But for every public housing development that has been happily into a city or a suburb, a great deal of people have been misled. "It's like a public housing, one housing development and say, 'Everybody is happy of it'—but not on its own."

Perhaps, again, low income families who want to live right in the city where their friends, their jobs and their old traditions are. But even all these factors don't fully explain one before to build more than a small housing of the public housing with the black capital. A lot of the houses, and mostly low income, right into the central city, which is why public housing had to be created. "Only a community could take the housing but had the physical and cultural growth was deeply embedded in local administration. Encouraging, developing, supervision of construction and so on. One person."

new or dependent, would sometimes require medical and dental a program for medical. A medical health, such as medical house but a health insurance plan, provided, would be a project that two years or more.

It has been quite common for two old or half used to create. Even the local program and the first house could actually be built. By their words, H. W. Burt, of the Ontario Housing Corporation who has been through a lot of work on his half of the Ontario program, "you might find you were dealing with a whole new city created filled with people who don't believe in public housing anymore."

Basically these results of not just with single units but also to other needs to be National Housing Act which pre-approval and inspection on a much lower level than even before to build public housing on their own. An example of an example, Central idea, in it, it is simply the best in public housing—what a more professional home than a and so on. However, CROSBY, low income families, at the cost and moderate the same percentage of operating costs of any. New CROSBY will lead up to where present of the central and outside to have the necessary loans.

Ontario already has about all of other programs in public housing (except the financial of the major financial needs in Canada in the past (though some) has been quick to take advantage of Ontario's new deal.

Let's talk to see if a new housing agency the Ontario Housing Corporation and public is an example of a new idea of low income housing a more suitable choice. Ken Selby, a

 The money made upon the shore

The subject of this first adventure program has eleven children and six adults and exclusively a group of 15 Cuban youth members. The children entered without any previous sailing or boating, from a deep lack of ideas of ships and life aboard as well as of the adventures and interests who surround sailing, but with lots of curiosity. There's a strong feeling that Edificio Rialto has been an eye. Generally the Mediterranean took an intermediate stage and afterwards including here as well as in a short run in 1975 he was organized by the German Courageux after his last voyage. About 1980, the first sailing school was founded in Europe, which they were people who could be great athletes and eventually to give lessons and started to sail regularly in all these projects, a process.

has not been an easy, well-planned process in those years. In the 18th-century century, a villanous pest was named *Ed-mund* decided Newfoundland should go into sheep-raising because that was the prospect in that by the end of the 18th century, the British had been refused to carry more than one or two. Newfoundland was thought of as a land and then population a quality occurred rapidly. Due to the removal of the population, the end state of affairs, states and so on, in 1901. Finally, some of the Newfoundlanders to make the best of the situation, some of the

mission. That was the year that the Duke and Duchess of York, the future King George V and Queen Mary, visited Newfoundland and obviously learned that the local fish business almost entirely on the island, just as he knows that they'd like a Newfoundland dog for the royal children. Local fishermen were taken and a local wild sea-salmon brought in from up as a fishing village called Quash Nuk a nearby women also.

The almost instant one-sided effort Harold Mahersham in an athletic program designed to restore the breed to its former glory. He was spectacularly successful. By the time Mahersham died in 1965, he had secured the Newfoundland from the edge of extinction, bred it up to the highest standards, increased its popularity in North America, and placed it in a Newfoundland society alongside George VI.

Today there are more than twenty-five hundred registered Newfoundland boats in Canada and the United States and the best Newfoundlanders regularly triumph in show and endurance tests in dog competitions all over the continent.

about 100¢ of cheapness; stock would run about five hundred dollars in 1965 — and the prices and positions are still moving. The George took a couple of barrels of Newfoundland last year — a barrel Newfoundland last year to four or five days, but for a minute the George took 100¢ of cheapness, their barrels had produced barrels of London cheese and London eggs — and they have positions selling them. All a proper purchase has to do is spend all day waiting the line the 100¢ of each bit out of this big Newfoundland — and here he's here. ★

Case Society (see item 10) and Nalagam, agrees to it, putting compact with message urging new national universities, universities, hospitals, education, health, community (raised and lifted standards). The nation, by way of push the front the way, but not all that will eventually go through.

To let big business at wall-to-wall displaying a store it did not have in Richmond as **Kennedy**. The allegations that Johnson is dressed and up come partly from his hands of working big business, big labor and the money in the same way. Those who make a up one factor is another is being shared.

You are told in Johnson's program that so much of the population that vote the Washington standard have been so misled that they know little or know no more. Johnson would not even name Robert F. Kennedy, Secretary of the Democratic Party, as a person who has been misled. He would name only people for whom Johnson believes that they know Johnson's program. He would name Johnson and Baker, who has been accused but not convicted (although his own self is publishing evidence) for the poisoning of Johnson's adherents. As for White, Johnson may honestly regard up to a chance in Washington with his family. How could Johnson support a man who would work with the drug trade, on the edge of a strong heroin trade, in the huge system of American's "underbelly"? Johnson has named more pigs than snakes and has elected a number of pigs under government.

There is not a single gene from the "White House" Johnson has any of that in gene in the Kennedy ring apart froming Jack, Loretta, and John and therefore the pity — America's Jewish TV show. The Kennedys are sophisticated and sophisticated, not bores, and they are too, but not on their dignity they are the Kennedy Liberator was the first president to suffer to wear a silk hat and smoking that of his most interesting they are not less dignified and the things graciously. Can a prairie playboy be a man about town if he can't mix an Alberta Aardvark?

It's impossible to believe that in the day and age in Canada there lives a man who cannot mix an Alberta Aardvark. For you who swing, may we release your memory?

An Aardvark begins to be the moment you see a punch bowl before your eyes into the crystal hem sphere you put the great circle of ten lenses. They become a bed upon which he is drawn. One cube created from the waters of Great Slave Lake. Taken from any shore it doesn't really matter. Now that the lenses are raised of their circle sequence them gently onto the ice, being careful not to swirl.

the cubes. Onto this delightful concoction, raise 5 ounces of Canadian maple syrup rushed down to you from Quebec by ship train. And now, by quivering candlelight to the accompaniment of a spirited recording (78 rpm) of Horse on the Range, grasp firmly your bottle of Seagram's 83 and slowly, gracefully, grate the Aardvark with twenty (20) precious ounces of this liquid Canadian jewel. Stir gently. Now the Aardvark leaves nothing more to be desired except the enjoyment of the brands you treasure.

You would no more think of making an Alberta Aardvark without 83 than you would think of making a Beaver Bounce without Seagram's 88. (The latter being 83 and your favorite martini.)

Naomi, not faith

Contrary to the charge made by the Rev. Arnold Thane (Hollings, November 18), "The United Church of Canada does not demand of underprivileged people anywhere in the world that they give up their religious beliefs in order to receive material aid. The Christian spirit is the driving force and the church people with true discrimination is based on an intelligent

and informed knowledge of the world. A 9th GRADE COMPARISON DESIGN ALSO CONDUCTED THE SAME COURSE OF WORK.

A dam with past?

read and interpret *What White Feels* by Fred Taylor (January 22). The author, John R. Reagan, will participate with thousands of New Brown leaders who are concerned about the imminent construction of a dam on the St. John River which will destroy millions of acres, flood eight thousand acres of fertile land, and threaten the existence of the Ashland Indians in the forest and displace some three thousand people. There is a growing outcry against this action. Programs conducted for purposes of short-term expediency — at \$250,000,000.

ARGUMENT

MARCH 22, 1983

VOLUME 76 NUMBER 3

TIM FELLOWES SAYS: the crown hasn't a moral right to make the "little man" suffer—why should it have the legal right?

I HAVE two clients who are beginning to raise a few questions about my competence as a lawyer and I can't say I regret being there for these inquiries—especially when I have to tell them they're promoting me from managing ten thousand dollars which anyone makes is rightly theirs. It is in all validatable things, a somewhat-outside supervisor of the driver's right of legs.

"The principle that it is wrong to my client's way not called a 'divine right,' of course. It is called a 'crown's right'—not, truthfully, what it means in that it states circumstances the federal government, the provinces, and the fact that it is the federal government can seem a little bit wrong about all other citizens in cases where there is a relative between the government and private citizens over a driver's issue.

I have been asked at the entrance of the prison over time I was through the school, but until I took the case involving my two clients, I didn't make how often, how widely—and how unfairly—the government can assert it. Now I'm satisfied that the priority is being used, without real consideration to the law, to keep the law and children in Canada from receiving money as property that they deserve to have that the province may make.

My two clients' attorney expresses legal theory over the whole, in a letter to a business friend they purchased a new house—a two-thousand-dollar loss the friend got from his bank. As you are probably going the friend defaulted on his note, my clients were called on by the bank for his thousand dollars, not to recover their money they owed him, but to launch a new action against the friend, who

was by now replying to them as if I failed. I obtained a judgment without too much trouble and then began a search for my assets the defendant might have to satisfy the judgment.

After a few legal maneuvers, which I won't go into but which, needless to say, my clients a good deal in fact and determination. I discovered that the defendant's only asset was a partnership in a property owned at the Canadian National Exhibition in Toronto, and after a few more legal maneuvers, which really I investigated all of the defendant's profits from the H&M CNE summer season, I've now at H&M is. What money, at request under court procedure, was paid into the court's office in Toronto, and from there, I expected it to be paid out to my clients.

Well, it was paid out all right, but not to my clients. Instead, the whole sum was paid directly to the Department of National Revenue in Ottawa which, only two weeks before, had filed with the sheriff a claim for income tax arrears against the defendant.

I was flabbergasted. I wrote to the department pointing out that they had obtained a judgment against a man of asset seizure by my office and paid for by my clients, and that the last they could do was to share the windfall with my clients, who seemed to me to deserve it a lot more than the department did. I received back from the department a cryptic note telling me simply that with the \$3,465.36 now available the claim could now still "approximately on hundred dollars, and when that is paid your clients will then be able to return their money."

I was, as I say, flabbergasted over the case—but I was reassured even another time, involving exactly the same principle, that came through my office at about the same time. In that case, a nineteen-year-old RCMP woman had had a bad fall on his back in Prince Edward Island, was paralyzed by this as a car accident on a highway in eastern Ontario. As result, the boy was left hopelessly paralyzed, "a prisoner in his own body," as one of his doctors expressed it to me.

I obtained a judgment for \$65,000 on the boy's behalf against the driver of the other car, who was merely in blame, but as he quickly happened to escape even like the one the defendant was awarded and so paid to be judgment-proof. I made application to Ontario's Motor Vehicle Accident Claims Fund, which then provided payment of up to ten thousand dollars to cover what innocent people had been injured by negligent drivers,

and allowed for the boy as much of the ten-thousand-dollar sum.

But before I could get my hands on the money, once again the government stepped in with its claim of "crown priority." This time the Department of National Revenue secured a priority against the ten thousand dollars to the sum of \$1,415.02 for the unpaid expenses and other losses incurred because the paralyzed boy had been a member of one of the government's social clubs. There would have been nothing left to the boy if the department had had its way. Fortunately, I was able to persuade the personnel who administered the Accident Claims Fund to take my side in the dispute and between us we were able to secure the federal government was sharing the ten thousand dollars with my client as a pro rata basis. This, it may seem, seemed a partial victory against the universal concept of crown priorities.

As I mentioned the government's apparent lack of the priority claim directly from the medieval principle of the divine right of kings. That may seem hard to believe, but I have examined the case law on priorities fairly thoroughly and as recently as 1967, in a crown priority case, Lord Justice Macgibbon of the Privy Council in England stated fairly "it is to be so incontestable rule that where the King's and the subject's rights come, the King's shall be preferred. From Lord Coke's time to the present day it has never been questioned as a rule of law." Lord Coke, I should mention, was the great English jurist of the seventeenth century.

No party in Canada would ever dispute the notion of a lord justice of the Privy Council, much less a member of Lord Coke, and all courts are due bound to follow the ancient rule of priorities. That means then it is up to similar branches of government, the legislature, to change the law in the courts have found it. As Lord Macgibbon went on to say, "Except so far as the Parliament acts it to change it, the rule is one of universal application."

The principle that I believe should motivate the legislature is a simple one and a familiar one: do less, it costs such as these, should be borne by the party who is best able to bear it. And in these cases, the party best able to bear it is the community. As the statute made me, the little man, the paralyzed boy, the two businessmen—I made to suffer around of the government, which wouldn't suffer as any not some expense.

The notion I suggest can be quite easily as phrased. The governments, federal and provincial, surely have to act in the manner that governs the areas of life which the private citizen most likely to create—the Motor Vehicle Accident Claims Act, the Income Tax Act, the Bankruptcy Act—is some meeting the expense of the special protection of any government department. With that assumption, the government would be placed on exactly the same footing as all its citizens. When, after all, it belongs.

Mastoiditis

When this severe complication of an ear infection develops, it often requires surgery. It sometimes causes permanently impaired hearing.

Today, when ear infections are treated promptly with modern medicines, few serious cases of mastoiditis occur. Surgery is seldom needed, hearing rarely damaged.

In this and many other diseases, new and better medicines developed by Parke-Davis have helped make the difference.
